EDUCATION

Texas A&M University–Corpus Christi <i>M.S. Computer Science</i>	May 2026 GPA: 3.6/4.0
GSFC University, Vadodara <i>B.Tech Computer Science</i>	May 2024 CGPA: 7.5/10

WORK EXPERIENCE

Graduate Assistant <i>Texas A&M University–Corpus Christi — Math Learning Center</i>	Jan 2026 – Present Corpus Christi, TX
--	--

- Delivered structured academic support and guided students through problem-solving methods across multiple math courses.
- Managed tutoring operations, schedules, and documentation, supporting over 100+ student interactions efficiently.

Voluntary Work – Web Scraping & Web Design <i>Texas A&M University–Corpus Christi</i>	Summer 2025 Corpus Christi, TX
---	-----------------------------------

- Automated data extraction for faculty research by building Python-based web scraping pipelines.
- Enhanced internal university webpages through improved layout structure, accessibility, and UI/UX styling.

Web Developer <i>Sync Web Solution</i>	Aug 2023 – Jul 2024 Remote
--	-------------------------------

- Built a full-stack production website using React.js and MongoDB.
- Improved UI responsiveness, backend performance, and security while deploying hosting pipelines.

Data Management Associate <i>Bhagwati Hardware</i>	Jan 2022 – Dec 2023 Vadodara, India
--	--

- Designed SQL/Power BI dashboards for pricing analysis and business reporting to support leadership decisions.
- Cleaned and structured operational datasets, improving accuracy, reducing report time, and optimizing data workflows.

Software Intern <i>Redspark</i>	Dec 2021 – Jan 2022 Vadodara, India
---	--

- Developed a PHP-based student management system with secure authentication and course tracking.
- Optimized backend logic and SQL queries to reduce database load and improve application performance.

PROJECTS

Online Food Ordering System
– Developed a full-stack food ordering platform using Java, Servlets, JDBC, JSP, and HTML/CSS with secure login, menu management, and real-time order tracking.
– Optimized backend workflows and database operations, improving application reliability and reducing response latency.

SmartAssist – AI-Powered Smart Campus Assistant
– Built an AI-driven campus assistant using Python, FastAPI, LLMs, and a custom MongoDB-backed RAG pipeline for automated FAQ responses and chatbot interactions.
– Integrated agent-based automation and structured feedback generation for assignment evaluation, improving student support accuracy.

Smart Plan Weather System
– Engineered a real-time irrigation monitoring system using Arduino Nano, NodeMCU, and soil moisture sensors to collect environmental data.
– Automated irrigation decision-making through sensor-based logic, enhancing water efficiency and continuous monitoring.

SKILLS

Programming Languages	: Python, Java, JavaScript, PHP, .NET
Web / Frontend	: HTML/CSS, React.js, WordPress
Data & Analytics	: Power BI, Excel, Tableau, NumPy, Pandas
Databases	: MySQL, MongoDB, Redis
Cloud / DevOps	: AWS EC2, Docker, Git, GitHub
Other	: Graphic Design, Digital Marketing
